

ADSL Splitter- Installation Instructions

The **Marque Magnetics Part No: MM-3200B** is a balanced, low pass filter type POTS Splitter-R suitable for deployment in Australia and New Zealand. The splitter is intended for connection to the remote (customer) end of the ADSL installation and its function is to allow ADSL and POTS voice signals to co-exist on the same twisted pair copper line. The device is fully encapsulated to protect against moisture and physical damage.
